Professional Summary

Software Engineer with **1+ year of experience** in enterprise banking applications using **Java 8/17, Spring Boot, Spring WebFlux, Spring MVC, REST APIs, Spring Data JPA and MYSQL**. Hands-on experience with **CKYC 2.0** and **CTS** project, including **reactive programming, Create/Update APIs, PGP encryption/decryption, cheque scanner integration, MICR extraction, and image processing**. Skilled in **Mono, Flux, API integration, database operations, validation, exception handling, debugging, API testing, and production support**.

Projects

CKYC 2.0 – Central KYC Project 2025 – Present

Role: Junior Java Developer — Technology: Java 8/17, Spring Boot 3.2.4, Spring WebFlux, Reactive Programming, R2DBC, MSSQL, PGP Encryption/Decryption, REST APIs

- Worked as a Junior Java Developer on the CKYC 2.0 project, contributing to the development and enhancement of reactive REST APIs using Java 8/17 and Spring Boot 3.2.4.
- Developed and maintained Create and Update APIs for CKYC-related data processing and integration.
- Implemented RESTful APIs using Spring WebFlux and Reactive Programming with non-blocking request/response processing.
- Used R2DBC for reactive database connectivity and asynchronous interaction with MSSQL.
- Worked on PGP encryption and decryption for securing API requests and responses during data exchange.
- Implemented request validation, business logic, reactive data processing, exception handling, and API response handling.
- Participated in debugging, issue analysis, bug fixing, API testing, and integration activities.
- Collaborated with senior developers to understand requirements, implement enhancements, troubleshoot production/development issues, and deliver assigned modules.
- Followed REST API development practices, clean coding standards, and project-specific security and data-handling requirements.

CTS – Cheque Truncation System 2025 – Present

Role: Junior Java Developer — Tech Stack: Java, Spring Boot, Spring Data JPA, REST APIs, External Scanner, MICR, Image Processing, Java File System

- Developed Java Spring Boot REST APIs for the cheque scanning and processing module of a CTS web application.
- Integrated an external cheque scanner to capture cheque images and support automated cheque scanning workflows.
- Implemented MICR extraction and processing from scanned cheque images.
- Developed image-processing functionality to generate grayscale front, binary front, and binary back cheque images required for clearing-house processing.
- Implemented Java File System operations for storing, reading, and processing scanned cheque images.
- Developed functionality for endorsement number generation and printing on the back side of cheques during scanning.
- Implemented database operations using Spring Data JPA and contributed to validation, exception handling, debugging, testing, and API integration.
- Collaborated with senior developers and the .NET application team to integrate the Java-based cheque scanning module with the overall CTS application.

Technical Skills

- **Programming Languages:** Java 8/17, SQL
- **Backend Frameworks:** Spring Boot 3.2.4, Spring MVC, Spring Security, Spring Data JPA, Spring WebFlux, Hibernate
- **Reactive Programming:** Spring WebFlux, R2DBC
- **API Development:** RESTful APIs, REST API Design, JSON, JWT Authentication, API Testing, API Integration
- **Database Technologies:** MySQL, SQL Server (MSSQL), JDBC, R2DBC
- **Security:** PGP Encryption/Decryption, Data Encryption
- **Architecture & Concepts:** Microservices Fundamentals, Exception Handling, Logging, Performance Optimization
- **Tools & Platforms:** Eclipse IDE, Postman, Git, Maven, SFTP
- **Frontend Technologies:** React.js, HTML5, CSS3, JavaScript, Bootstrap
- **Development Methodology:** Agile Development, Debugging, Unit Testing, Production Support

Education

Master of Computer Applications (MCA) 2021 – 2024
Savitribai Phule Pune University, Pune, India
CGPA: 7.41

Certifications

- Full Stack Java Development - Techrel Institute, Pune
