Professional Summary

Java Developer with 1+ year of experience at Adroit Corporate Services Pvt. Ltd., developing REST APIs for enterprise banking applications using Java (8, 17), Spring Boot, Spring WebFlux, Spring MVC, Spring Data JPA, R2DBC, and MSSQL. Experienced in H2H file exchange and CKYC 2.0 applications with expertise in API development, database operations, encryption, validation, debugging, Postman testing, and production support.

Technical Skills

- **Languages:** Java (8, 17), SQL
- **Frameworks:** Spring Boot 3.2, Spring MVC, Spring Security, Spring Data JPA, Hibernate
- **Reactive Programming:** Spring WebFlux, R2DBC
- **API Development:** RESTful APIs, REST API Design, JSON, API Integration, Postman
- **Databases:** MySQL, SQL Server (MSSQL), JDBC
- **Security:** PGP Encryption/Decryption, JWT
- **Concepts:** Microservices Fundamentals, Logging, Debugging
- **Tools:** Eclipse IDE, Git, Maven, SFTP
- **Frontend:** React.js, HTML5, CSS3, JavaScript, Bootstrap
- **Methodology:** Agile Development, Production Support

Experience

Adroit Corporate Services Pvt. Ltd. 09/2025 – Present
Junior Java Developer Mumbai, India

Project: H2H (Host to Host) Web Application

Tech Stack: Java (8, 17), Spring Boot, Spring MVC, REST APIs, Encryption, SFTP, SQL

Description: A secure web application for exchanging financial files between the National Payments Corporation of India (NPCI) and banks. The application uses encryption to protect data, LDAP-based user authentication after initial login for secure access, and date-range reports that users can generate and download for monitoring and analysis.

- Developed and enhanced a secure H2H web application for file exchange between the National Payments Corporation of India (NPCI) and banks.
- Implemented secure file exchange functionality with encryption algorithms to maintain confidentiality and integrity of financial data.
- Developed functionality for users to generate and download reports based on specified date ranges for monitoring and analysis.
- Worked on backend APIs, validation, database operations, exception handling, debugging, and production issue resolution.

Project: CKYC 2.0 – Central KYC

Tech Stack: Java (8, 17), Spring Boot 3.2, Spring WebFlux, R2DBC, MSSQL, JWS, JWE, REST APIs

Description: A reactive backend application for Central KYC (CKYC 2.0) that handles customer KYC record Create/Update/Search/Download operations, with API request and response data secured using JWS and JWE.

- Developed and enhanced reactive REST APIs for CKYC Create/Update/Search/Download operations using Java (8, 17), Spring Boot 3.2, and Spring WebFlux with non-blocking Mono/Flux processing.
- Used R2DBC for reactive and asynchronous database connectivity with MSSQL.
- Implemented JWS signing and JWE encryption/decryption to secure sensitive API request and response data during exchange.
- Built request validation, business logic, and exception handling for reliable reactive data processing.
- Debugged, tested using Postman, and resolved development/production issues while following clean-code and secure data-handling practices.

Education

Master of Computer Applications (MCA) 2021 – 2024
Savitribai Phule Pune University, Pune, India **CGPA: 7.41**

Certifications

- Full Stack Java Development – Techrel Institute, Pune
